

Training

We have a number of highly experienced consultants who have gained their expertise over many years, not only are they well versed in their specialist fields they are also able to pass on this knowledge to others and we have thus put together the following training packages that can be of use to corporate organisations.

Fraud Awareness

For several years, following the instigation of "prime contracts" in the public sector, our company has delivered a series of fraud awareness courses to a number of major corporations and PLCs'. Our presentations are specially tailored for the construction/property management industry and focus on all aspects of fraud and corruption, including bid-rigging.

The process not only has intrinsic merit but our clients felt it gave them a competitive edge in meeting the Government's stringent demands for security and combating fraud.

Drug / Alcohol Awareness

Our drug awareness talk will help employers identify those employees who are under the influence of alcohol or engaged in the use or distribution of substances for non-medically prescribed purposes (controlled drugs), in any of its premises, whilst at work for the company or on company business. We will advise on the availability of tests to determine the levels of alcohol and/or non-medically prescribed drugs present, and help devise a company policy to deal with such issues.

Sexual Offences Awareness

We have devised and given presentations to local voluntary agencies, colleges, schools, and universities on reporting methods and victim care, for example the use of bespoke premises which catered for all needs of victims including medical and forensic facilities. This promoted public confidence and awareness of the facilities available to victims of sexual assault. These courses can be of benefit to private companies and major corporations.
